EMPOWERING BUSINESS CONNECTIONS: GROWTH & EXPANSION

PAPER INDONESIA, an esteemed B2B Exhibition, was inaugurated in 2018 as a focal point for the paper and pulp industry in Indonesia. With each iteration, it has gained prominence as a pivotal platform for industry players to showcase cutting-edge technologies and market trends.

However, the exhibition encountered an unforeseen hurdle in the form of the global pandemic, which led to the unavoidable postponement of the event in 2020 and 2021. This interruption underscored the challenges faced by industries worldwide. Nevertheless, the organizers demonstrated remarkable adaptability and determination, using the delay to refine their strategies and enhance the exhibition's value.

In 2023, PAPER INDONESIA is poised to make a triumphant return for its 3rd edition. The anticipation surrounding its resumption highlights the resilience of both the event and the industry it represents. As it reconvenes, the exhibition aims to once again facilitate crucial connections, knowledge exchange, and collaboration among key stakeholders in the paper and pulp sector.

PAPER INDONESIA presents a wide range of products categories

-  Paper Raw and Auxiliary Materials, Pulp, Paper and Paper Products **1**
-  Papermaking Chemicals **2**
-  Papermaking Environmental Protection and Waste Treatment Technology Equipment **3**
-  Papermaking Automation and Computer Control Systems **4**
